HALO Disinfection System™

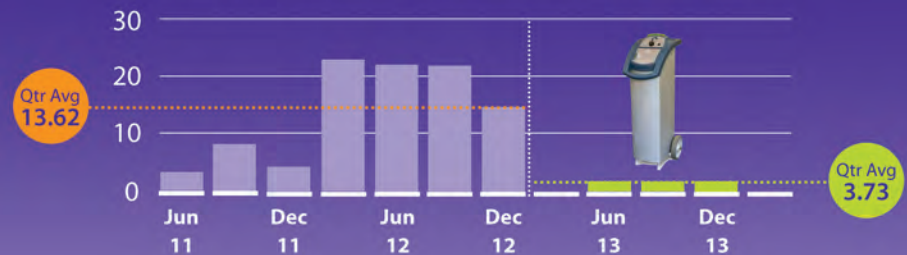

Saving lives one room at a time™

EPA Validated

WHOLE ROOM DISINFECTION

- Safe | Effective | Affordable
- Proven to significantly reduce infection rates

Hospital-Acquired *C. difficile* Infections | Rate per 10,000 Inpatient Days

Safe, effective and affordable no-touch whole room disinfection is here today.

In March 2014, the CDC reported a 2% decrease in hospital-onset *C. difficile* infections nationally between 2011 and 2012. During that same period, in-hospital use showed the Halo Disinfection System significantly reduced hospital-onset *C. diff* infection rates by 66%.

That successful result was achieved by following a protocol of fogging only *C. diff* isolation and precautionary rooms upon patient discharge (which is a very small percentage of patient rooms in most hospitals today).

Our hospital customers are winning the battle against this hardest-to-kill pathogen. Their success has proven the Halo Disinfection System delivers significant reductions in HAIs.

The Halo Disinfection System is:

haloFogger™

Hands-Free Dry Mist
Dispensing Device

Delivers aerosolized and concentrated Halo™ Disinfectant to every exposed surface within a room. Reaches into every nook and cranny that wiping and UV can't.

Sanosil haloMist™

Disinfectant Fogging Solution
5% Hydrogen Peroxide + 0.01% ionic silver

First EPA registered disinfectant aerosol validated for whole room disinfection. Ready to use - no wipe, no rinse. Non-corrosive formula is bleach and PAA free.

haloSpray™

All-Purpose Surface Disinfectant
5% Hydrogen Peroxide + 0.01% ionic silver

Broad-spectrum disinfectant formula kills bacteria and viruses on hard, non-porous surfaces. Ready to use no rinse formula is bleach and PAA free. Great for spot disinfection and adjunct fogging.

WHOLE ROOM DISINFECTION

- Kills 99.9999% of *C. diff* spores; effective disinfectant for MRSA, Staph, Norovirus, Influenza and more
- Safe - non-hazardous 5% hydrogen peroxide-based formula; odor-free and safe for use with sensitive electronics
- Effective - aerosol reliably goes where sprays, wipes and UV light can't
- Affordable - low capital investment; average cost less than \$12 per treated room
