INTRODUCING THE UV SMALL DEVICE DISINFECTION SYSTEM

One of the fastest, most effective and safest small device UV disinfection systems. Invented by one of the nation's leading experts on UV energy for antimicrobial applications, Dr. Wayne Clarke. His patented Photon Trap Technology is currently protecting the US Pentagon against bio-terrorism and has been put in service at leading medical facilities across the US in the AUVS Germicidal enclosure widely known as "The UV Box".

- Reduce HAI's and cross contamination
- Improve efficacy with your small device/ item disinfection
- Increase patient & family peace of mind and satisfaction scores
- Stop the harmful effects of chemical wipes on sensitive electronics & other devices/ items
- Stop spending money on costly chemical wipes or solutions
