With the Sentry M2F-T, protection follows you. The Sentry M2F-T is an affordable mobile UV disinfecting unit designed for easy positioning and simple control. It emits broad-spectrum UV light to eliminate up to 99.9% of the bacteria, viruses, and fungi in a space. In rooms that have been cleaned of mold, the unit will help control return growth if used routinely2.

The compact unit has two Helo F1 UV Light Engines in a lightweight, miniaturized design. Mounted on a tripod base, the M2F-T unit has a telescoping neck and adjustable UV head angle for perfect spot treatment where contamination is suspected.

#### **Single Cycle Operation Mode**

The operational mode is programmed through an Ethernet connection to the unit.

This unit will complete a single cycle of 15, 30, 45, or 60 minutes when the unit is plugged in for power. If interrupted, the unit will resume its programmed cleaning cycle once motion is no longer detected.

The units must be programmed before use.

The unit's redundant safety systems, including an integrated occupancy sensor, ensures the unit will not activate while the room is occupied and will immediately suspend operations if motion is detected in a previously unoccupied room.

#### **Installation**

All units ship with a 6 foot cord terminated with a grounded 110V plug. Plug in the unit after positioning it in the room.

#### 110V Outlet

The unit can be plugged into a non-GFI outlet. If an outlet is not accessible near the fixture location, you may require a sufficiently rated, grounded extension cord or have a licensed electrician to install an outlet.
