

**CLEAN AND SANITIZED HANDS**  
have never been more vital to our  
health & well-being.

- People fail to correctly wash hands 97% of the time
- One in four soap dispensers are contaminated with fecal & coliform bacteria
- Hospital-acquired infections impact 1.7 million people each year
- Mobile phones are seldom cleaned and likely dirtier than toilets
- Alcohol gels are not effective against all germs and pathogens

**HOW DO WE SLOW THE SPREAD  
OF DEADLY GERMS**  
while returning to “normal” life?

It's within your reach, with **HANDY!**

- Best-practices hand-hygiene compliance within your organization
- Confidence of employees and visitors in your health safety leadership
- Leadership in good health practices and germ-killing
- Healthy ecosystem that reduces the spread of dangerous pathogens

**HANDY** works in as little as three seconds to  
minimize bacterial and viral pathogens!

**HANDY UV-C Sanitizing Solutions - the world's first UV-C-based hand sanitizer!**

**HANDY Highlights:**

- 99.99% effective at killing germs, including coronavirus that causes COVID-19\*
- Sanitizes the air within a room via its integrated fans
- Efficacy proven by independent labs
- Uses similar proven and safe Ultraviolet C (UV-C) technology used in hospitals
- Effectiveness exceeds alcohol gels and real-world hand-washing practices
- Can save significant operational cost versus long-term gel use
- Sanitizes small objects — phones, glasses, stethoscopes, keys, etc.

\* COVID-19 surrogate used in testing

Imagine **HANDY** in medical facilities, cruise ships, fitness centers, train stations, casinos and nursing homes.

Imagine **HANDY** near restrooms, classrooms, dining areas, building entrances, kitchens and gaming areas.

Imagine **HANDY** just about **ANYWHERE!**

"It took us years to get **HANDY** ready, and it's been tough work. But I wanted to ensure it was done right. I wanted our solution to be as safe as possible and as effective as possible. I am hoping people use **HANDY** - it really does help. I envision **HANDY** as an important step to a healthier, virus- and germ-resistant world. That's my primary driving force and what I've worked tirelessly to achieve."
